education

Simon Fraser University
BA of Interactive Arts and Technology

The school teaches design theories and skills that can be applied in multiple fields. I practiced design skills, communication, and collaboration skills in team projects.

award

Dean's honor roll *Fall 2018*
in Simon Fraser University

(Term GPA 3.5 or higher with at least 12 term credits)

academic projects

Tool library showcase (Course: Interactive Design Methods)
Real client touch base, Graphic design, User research

- Apply many research tools in the client touch base and user research to have an accurate understanding of our client and their problem.

- Explore different design solutions that are grounded in our user data. Finally, choose the most feasible solution to make the organization more engaging for its members.

- Continuously update our process with the client. Make sure we understand client's constraint and refine our project based on their feedback.

App redesign: Peeknest (Course: User Interface Design)
UI/UX design, User Research

- Conduct multiple user testings on this existing app in the research term, find out the flaws in usability and know how its functionality mismatch users' needs.

- Prototype the refined user interface, try out a different way of feature integration to reach the best solution that presents the function of this app correctly.

employment

Coco fresh tea & juice

- Communicate with the customer actively about their in-store experience. Make our service improved every time we get customers' feedback.

- Keep eyes on the team working process and give help actively when someone gets a problem. Successful reduce the mistakes of the team in busy hours.

Jinya Ramen Bar

- Handle orders with a clear arrangement, keep track of the process to make sure the foods get delivered on time.

- Communicate and co-operate with the team members sufficiently to make sure the team runs properly.
